Kensington®

VeriMark™ Desktop Setup Guide

Kensington takes pride in making our comprehensive installation guides easy to follow with simple illustrations and step-by-step instructions. This guide will walk you through setup and help you get to know your VeriMark™ Desktop.

Please update operating system (Windows 10) before setting up Verimark[™] Desktop. If using an online service for WebAuthn make sure you use the latest browser version (Edge, Chrome, Safari and Firefox.)

VeriMark[™] Desktop Shopify Setup Guide

1. From your Shopify admin, **click** your username and account picture.

2. Do one of the following:

a. Click **Your account > Security**.

b. Click Your profile.

Note: If you haven't set up a single login, then you'll see Your profile instead of Your account.

2. EN	TER YOUR CURRENT PASSWORD	
	Cancel Add devie	æ

6. Touch the Fingerprint sensor

8. Write down your recovery codes and keep them in a safe place. If you don't have access to your security key, then using a recovery code is the only way to log in to an account that has two-step authentication enabled.

VeriMark Gen1 has been added as a security key If you want to log in on a different device, you will need another 2-step authentication method or a recovery code. Make sure you save your recovery codes so you don't get locked out of your account. Learn more.							
Treat your recovery codes as you would your password. We recommend saving them in a password manager like Lastpass, or 1Password.
