3. Tap Two-factor authentication

- 4. There are three methods to choose from: Text message, Authentication app, or Security key.
 - 5. To get started, you will first need to turn on either the Text message or Authentication app two-factor authentication method.

 Two-factor authentication
Two-factor authentication
Text message
Use your mobile phone to receive a text message with an authentication code to enter when you log in to Twitter.
Authentication app
Use a mobile authentication app to get a verification code to enter every time you log in to Twitter.
Security key
Use a physical security key that inserts into your computer or syncs to your mobile device when you log in to twitter.com using a supported web browser. Currently, you can't use a security key to log in to the Twitter app. Learn more

6. Click Security key

- 7. Read the overview, then click **Start**
- **8.** Insert your VeriMark[™] security key to your computer's USB port and touch it.
