Kensington®

VeriMark™ Desktop Setup Guide

Kensington takes pride in making our comprehensive installation guides easy to follow with simple illustrations and step-by-step instructions. This guide will walk you through setup and help you get to know your VeriMark[™] Desktop.

Please update operating system (Windows 10) before setting up Verimark[™] Desktop. If using an online service for WebAuthn make sure you use the latest browser version (Edge, Chrome, Safari and Firefox.)

VeriMark[™] Desktop GoDaddy Setup Guide

1. Go to your GoDaddy and login using your username and password

GoDaddy Sign In	Ì.

or sign in with	
a f G	

2. Under Account settings click on Login & Pin

iviy Products	Account Settings A

3. In the 2-Step Verification section, click Add Verification

2-Step Verification
When you enable 2-Step Verification, you add an extra layer of security to your account. You sign in with something you know (your password) and something you have (a code sent to your phone).
How to set it up:
 Choose a method to receive codes through your phone
2. Verify the method you chose works when we send you a code
Add Verification

4. Select how do you want to receive verification codes, select **Security key** and select when you want to use 2-step verification. **Select Every login**. Then click **Next**.

2-Step Verification		
How do you want to receive verification codes? Authenticator app ⑦ 		
 SMS text messages Security key ③ Note: you will need to add a back-up method if you want to call in for support 		
When would you like to use 2–step verification?		
 Every login High risk transactions only (?) 		
Cancel	Next	

Have your VeriMark security key nearby, but don't connect it yet.

5. Click **Next** and then follow the onscreen instructions. Once we verify your key, you'll see a success message.

Make sure your key is with to your computer yet.	you, but not connected
Previous	Next

6. Click Add Back Up

7. Below Choose your additional verification method, select **Security Key** and **click** OK

8. Click Next and follow the onscreen instructions to set up security key

9. Click Add Back Up

2-Step	Verification
--------	--------------

If you use a security key for a verification method, you also need a backup method, so support can verify your identity when you call them. We recommend an authenticator app, as it is more secure.

Add Backup	
Not Now	

10. Choose your additional verification method, select **Authenticator app**

11. Click **Next** and follow the onscreen instructions to set up the app as your backup authentication method.

2-Step Verification
On Your Phone
 Install an Authenticator App from your phone's store such as the Google Authenticator App.
2. Open the Authenticator App.
3. Tap the Add icon or the Begin Setup button.
 Choose Scan a Barcode, and scan using your phone:
Unable to scan the barcode?
