Fix the localisation issue to detect from system locale  
Fix key chording bound for “Scroll Right” and “Scroll Left”  
Increase font size  
Fix “Minimise All” issue

1/8/2020

Version 2.1.10

Fix issue where Helper can't be resumed when removed from startup menu  
Fix issue where Helper quits during uninstall process, before user's confirmation  
Fix single axis malfunction when using same modifier key with slow pointer  
Fix white that appears when changing resolution  
Fix UI partition that is incorrect under low resolution with 125% text size  
Add localisation to the KensingtonWorks driver download balloon message  
Add Ergo Vertical Wireless Mouse  
Update the image of the Ergo Wired Mouse  
Update Tutor images

1/9/2020

Version 2.1.11

Update Win 7 BLE device hardware IDs and Win 7 driver

2/24/2020

Version 2.1.13

Driver update: Add Bluetooth 3.0 HID's for new dual-mode trackball/mouse  
Fix issue where erasing the cache file “Settings” will lose the bind to cloud record  
Fix Google Cloud login issue when user selects “Bind to Cloud”

2/25/2020

Version 2.1.14

Feature change: Define “Second Drag Action” as “Drag Release”  
Change backup restore success message icon

3/20/2020

Version 2.1.15

Add Track Scroll feature  
Remove TAU (test automation) commands “emulateButtonClick” and “emulateButtonPress” from release build, due to security concerns

4/9/2020

Version 2.1.16

Update “Copyright © 2020 ACCO Brands LLC.”  
Add shortcuts for supported keys: backspace, down arrow, up arrow  
Fix issue with single axis and slow pointer when setting a different modifier key

5/15/2020

Version 2.1.17

Fix post-keystroke bug for “Pro Tools”  
Update translation json files for “ja” & “zh-TW”. (Japan and Traditional Chinese)

6/5/2020

Version 2.1.18

Add navigation feature – “Auto Scroll”

- Click button to enable “Auto Scroll”
- Click any button to disable “Auto Scroll”
- Two scroll directions: horizontal and vertical
- Move trackball to start “Auto Scroll” for 15 seconds (countdown starts from last movement of trackball);
- During “Auto Scroll”, slight/short movement of the trackball will hold “Auto Scroll”
- During “Auto Scroll”, normal movement of the trackball will change the direction of “Auto Scroll”
- Limitation: for application-specific setting of “Auto Scroll”, “Track Scroll” can’t be disabled by switching to another application until a trackball button is clicked

Change UI flow:

- When launching KensingtonWorks, go to the configure trackball page directly if a single trackball is connected
- Go to the configure trackball page when a new trackball is plugged in

9/15/2020

Version 2.1.19

Add Orbit Fusion Trackball support  
Fix “Media control shortcut” bug of ver.2.1.18

10/31/2020

Version 2.2.2

- Improve the button event handling algorithm.
- Fix issue Navigation “HOME” “PAGE UP” malfunctioned
- Fix issue Left key and right key can’t be released after pressing simultaneously
- Fix issue It takes two clicks to get the Left Drag to stick
- Fix issue A combination of simultaneously pressed left and right trackball keys. Normally this simulates a middle mouse click, however it is often interpreted as a drag and drop operation.
- Fix issue Redefine the behaviour of Double / Triple click to be the same as the one of TrackballWorks

12/18/2020

Version 2.2.5

- Added left-handed Ergo Wireless Mouse support.
- Fixed the bug that in critical timing of button debouncing period, a button up event may be missed.

2/19/2021

Version 2.2.7

- Now supports the Pro Fit® Ergo Vertical Wired Trackball
- Replace the communication method of ‘http server’ by ‘shared memory’ for a security concern.
- Supports the “Tilt” button repeat feature.
- Enhanced the click response time of the driver to accept fast click and fast double click
