Kensington®

VeriMark[™] Setup Guide

Kensington takes pride in making our comprehensive installation guides easy to follow with simple illustrations and step-by-step instructions. This guide will walk you through setup and help you get to know your VeriMark[™].

Please update operating system (Windows 10) before setting up Verimark. If using an online service for WebAuthn make sure you use the latest browser version (Edge, Chrome, Safari and Firefox.)

VeriMark[™] Shopify Setup Guide

1. From your Shopify admin, **click** your username and account picture.

2. Do one of the following: a. Click **Your account > Security**. b. Click Your profile. **Note:** If you haven't set up a single login, then you'll see **Your profile** instead of **Your account**.

3. In the Two-step authentication section, click Enroll a new device.

4. Select Security Key

| Turn on two-step authentication | × |
|---|------|
| Select an authentication method for your account: Authenticator app Use an app to generate an authentication code when you log in. | |
| SMS delivery Receive an SMS/text message with an authentication code when you log in. | |
| Security key Use a compatible security key like a fingerprint reader or USB key when you log in. | |
| Ν | lext |

5. In the fields provided, enter a nickname for the device to enroll and your account password

6. Touch the Fingerprint sensor

- **7.** Activate your security key. You are provided with a list of 10 recovery codes.
- 8. Write down your recovery codes and keep them in a safe place. If you don't have access to your security key, then using a recovery code is the only way to log in to an account that has two-step authentication enabled.

| Treat your recovery codes as you woul password manager like Lastpass, or 1P | ld your password. We recon ² assword. | mmend saving them in a | | | |
