

VeriMark™ Guard Setup Guide

Kensington takes pride in making our comprehensive installation guides easy to follow with simple illustrations and step-by-step instructions. This guide will walk you through setup and help you get to know your VeriMark™ Guard.

Please update operating system (Windows 10, Chrome OS and macOS) before setting up VeriMark™. If using an online service for WebAuthn make sure you use the latest browser version for (Edge, Chrome, Safari and Firefox.)

VeriMark™ Guard 1Password Setup Guide for Windows

1. [Sign in](#) to your account on **1Password.com** on your computer

Sign in to your 1Password account

Email

Secret Key [Find your Secret Key](#)

Master Password

This is a public or shared computer

[Sign in](#) [Having trouble signing in?](#)

2. **Click** your name in the top right and choose **My Profile**

3. Click **More Actions** and then **Manage Two-Factor Authentication**

[Change Email](#)

[Regenerate Secret Key](#)

[Change Master Password](#)

[More Actions](#) ⋮

4. **Turn on** Two-Factor Authentication and under Set Up another second factor click on **Add a Security Key**

Two-Factor Authentication

Two-factor authentication is an extra layer of protection for your 1Password account. When turned on, a second factor will be required to sign in to your account on a new device, in addition to your Master Password and Secret Key. [Learn more.](#)

Two-factor authentication is turned on for your account. [Turn Off Two-Factor Authentication](#)
