

Kensington takes pride in making our comprehensive installation guides easy to follow with simple illustrations and step-by-step instructions. This guide will walk you through setup and help you get to know your VeriMark™ Guard.

Please update operating system (Windows 10, Chrome OS and macOS) before setting up VeriMark™. If using an online service for WebAuthn make sure you use the latest browser version for (Edge, Chrome, Safari and Firefox.)

VeriMark™ Guard GoDaddy Setup Guide

1. Go to your [GoDaddy](#) and **login** using your username and password

2. Under **Account settings** click on **Login & Pin**

3. In the **2-Step Verification** section, click **Add Verification**

4. **Select** how do you want to receive verification codes, select **Security key** and select when you want to use 2-step verification. **Select Every login**. Then click **Next**.

• Have your VeriMark™ security key nearby, but don't connect it yet.

5. Click **Next** and then follow the onscreen instructions. Once we verify your key, you'll see a success message.

6. Click **Add Backup**

7. Below Choose your additional verification method, select **Security Key** and click **OK**

8. Click **Next** and follow the onscreen instructions to set up security key

9. Click **Add Backup**

10. Choose your additional verification method, select **Authenticator app**

11. Click **Next** and follow the onscreen instructions to set up the app as your backup authentication method

12. You are all set!
